Frontend Development:

HTML5, CSS3, JavaScript (ES6+), React.js, Redux Toolkit, Bootstrap, Responsive Web Design

Backend Development:

Node.js, Express.js, REST APIs

Database:

MongoDB, Mongoose

Authentication & Security:

JWT Authentication

Tools & Platforms:

Git, GitHub, Postman, Swagger, Axios

Other Skills:

SEO Basics, Data Annotation

Profile

Aspiring Full Stack MERN Developer with strong foundation in JavaScript, React, Node.js, and MongoDB. Experienced in developing responsive and user-friendly web applications, integrating RESTful APIs, and implementing authentication systems. Strong problem-solving skills and passionate about building scalable and efficient web solutions.

Projects

E-Commerce Platform (MERN Stack)

A scalable full-stack e-commerce platform built using the MERN stack, enabling users to browse products, manage cart items, and complete secure checkout processes. It includes role-based authentication, product and order management, and an admin dashboard for full system control and monitoring.

Learning Management System (LMS)

A full-stack web application designed to facilitate online learning by allowing instructors to create and manage courses while enabling students to enroll, access learning materials, and track their progress. The system provides role-based access control for students, instructors, and administrators, ensuring a structured and secure learning environment.
